

QUANTUM RESONANCE MAGNETIC ANALYZER

01 Prep

Please remove as much jewelry as possible, including earrings, necklaces, rings, and smartwatches. Permanent bracelets are acceptable, but the less jewelry, the better. Sit comfortably with your legs uncrossed and your feet flat on the ground. Take a moment to relax and settle in. We'll be using your left hand for the scan, so please make sure it's easily accessible. During the scan, try to keep conversation to a minimum. Just listen to my instructions to maintain focus and enhance the effectiveness of the process.

02 During

Alright, let's get started with the ****Quantum Resonance Magnetic Analyzer****. Just a quick note: the screen you see right now is just a countdown clock and doesn't show your results, so no need to worry. Once it hits "600", the scan will be complete, and you can remove your hand.

This device is about 85-92% as accurate as a blood test. For the best results, it helps to be fasted, rested, and regulated, but even today, you'll find the results to be surprisingly accurate!

It uses technology similar to what you'd find in body composition machines. Plus, it's completely non-invasive, painless, and takes less than 5 minutes.

Here's how it works: everything in your body has energy and electrical currents, which is why we can use shocks to revive someone after a heart attack. Right now, it's sending frequencies throughout your body to test and register the different frequencies of 45 vital processes happening at this moment.

In just a moment, we'll receive a report – about 120 pages long – covering all sorts of information, from brain health and digestive health to heart health, kidney function, liver health, thyroid status, and even heavy metal and toxin levels.

At the end of this report, which I'll email you, you'll find some lifestyle recommendations and suggestions that we'll discuss on that day.

I do want to mention that while we can't say our products cure, treat, prevent, heal, or mitigate anything, and this machine isn't for diagnosing conditions, the insights you gain can be a useful tool for understanding your body better.

Remember, you know your body best, and I always encourage you to consult with your healthcare provider about any specific concerns.

03 After

Here, you'll see the 45 different processes we've evaluated. It's a lot of information to go through, so for convenience, we'll email you the full report as a PDF. For now, I'll walk you through the cardiovascular section as an example of how to read the rest.

At the top, you'll find the name of the system being tested, followed by the specific test item, the testing value, your actual value from today, and a color-coded scale. If you scroll down here, you'll see a color legend explaining the scale. The key areas to focus on are the yellow and red indicators.

At the end of this approximately 120-page report, you'll find a Comprehensive Report Card.

This summary highlights all the areas marked in yellow and red and provides lifestyle suggestions and product recommendations based on those findings.
